- VPS recommendation

Installation :

Please watch the video on swing vip webpage for installation steps or click link below to watch :

<https://youtu.be/UTkSnLDJY0M>

The file is license protected in order to use the EA you need to have license key. The license key works on your given MT4 account number

To receive license key :

Right after your purchased please send an Email to support@sinryadvice.com with your Mt4 Demo or Live account number and purchase receipt or order number.

Our team will reply you with keys in less than 24 working hours.

Recommended setting :

Any broker with mt4 account you can use for swing vip

Use ECN or Standard account type - Do not use Mini or Cent acc

Leverage must be above 1:100 - If 1:500 is even better

Run EA on these 5 pairs for best results:

EURUSD-AUDCAD-GBPUSD-NZDCAD-USDCAD

We recommend you use minimum 1000usd starting fund with 0.01 lot size in order to have below 20% drawdown.

You can also use 500 usd starting fund with 0.01 but drawdown expected will be below 38%.

Open these 5 pairs chart on mt4 and put the time frame on 1 min

Put the Ea file into expert folder of your mt4

Put the news filter file in Indicator folder of your mt4

Put the 5 preset files into Preset folder of your mt4

Add the EA file to each chart one by one (make sure charts are one 1min and Auto trading is on)

Go to tools tab and in option and turn on "Allow DLL"

Add the swing vip to chart, go to input tab and load the preset for each pair then put the license key which you requested already by email.

Select your lot size according to your fund in input list, LOT section

For example : if you have 1000 usd fund, use 0.01 lot for each 5 pairs - if 2000 usd fund use 0.02 and so on (low risk mode)

Do not change any parameters in input.

Broker Recommendation:

Swing vip works on all mt4 broker but there are some factors that may cause for better results.

Brokers Fees, Account types, Server Speed and Swap fees and how EA friendly the broker is.

We have tested many brokers and so far OpoForex broker is the best for Robot trading because of their low fees and high server speed.

Opoforex is a modern and crypto friendly broker which has very unique dashboard for users experience and leverage up to 1:500 with very low fees.

We recommend to use Opoforex broker with below info:

ECN account - if your fund is below 10,000 usd

ECN PRO account - if your fund is over 10,000 usd

Leverage 1:500

OpoForex broker Link:

VPS recommendation:

You can use link below to order VPS

You can use windows VPS server which is monthly around 9 usd
